The fastest distributed analytical engine for data mesh

ABOUT ZETARIS: **The Networked Data Platform**

Data is an enterprise's most valuable asset. With The Network Data Platform, an advanced analytical processing engine to join and query distributed data sources in real-time, organisations are enabled to make fast decisions based on accurate, timely and trusted information.

WHAT WE OFFER

What's the way forward for business decision-makers who want a single, real-time view of all the data in an accurate and governed way? The answer is the Zetaris Networked Data Platform, an advanced analytical processing engine designed to unlock the hardest data problems by joining and querying distributed data sources in real-time.

Zetaris has been engineered for speed, scale and security required for complex analytical querying across streaming, structured, semi-structured and unstructured data formats.

A non-disruptive technology, deployed from Azure cloud with a strong solution verticalization in healthcare, telco and financial services, Zetaris can deliver projects 3x faster and reduce maintenance 10x with specialized industry knowledge. You can integrate seamlessly with Microsoft Azure Products like Purview, Delta Lake and Power BI. Zetaris compliments and turbo charge your Azure investment.

This technology is built for performance and integrates with existing data architecture to extend the reach of analytics, reporting, AI/ML workloads.

"Zetaris is a valued GenV partner that has worked with us to develop the foundational data platform. Powered by Zetaris, the GenV data platform will enable expansion to integrate with many other diverse datasets and support future research"

*– Natasha Zaritsky, Director, Platforms and Operations,
GenV Program, Murdoch Children's Research Institute*

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
